Price of on-site homemade cable trays

Overview

The cost of steel cable trays generally falls between $5 and $25 per meter, depending on several factors such as the tray''s gauge, finish, and the specific features of the tray.

Key Takeaways

The cost of on-site homemade cable trays typically ranges from $2 to $25 per meter, depending on material, design, and labor involved.

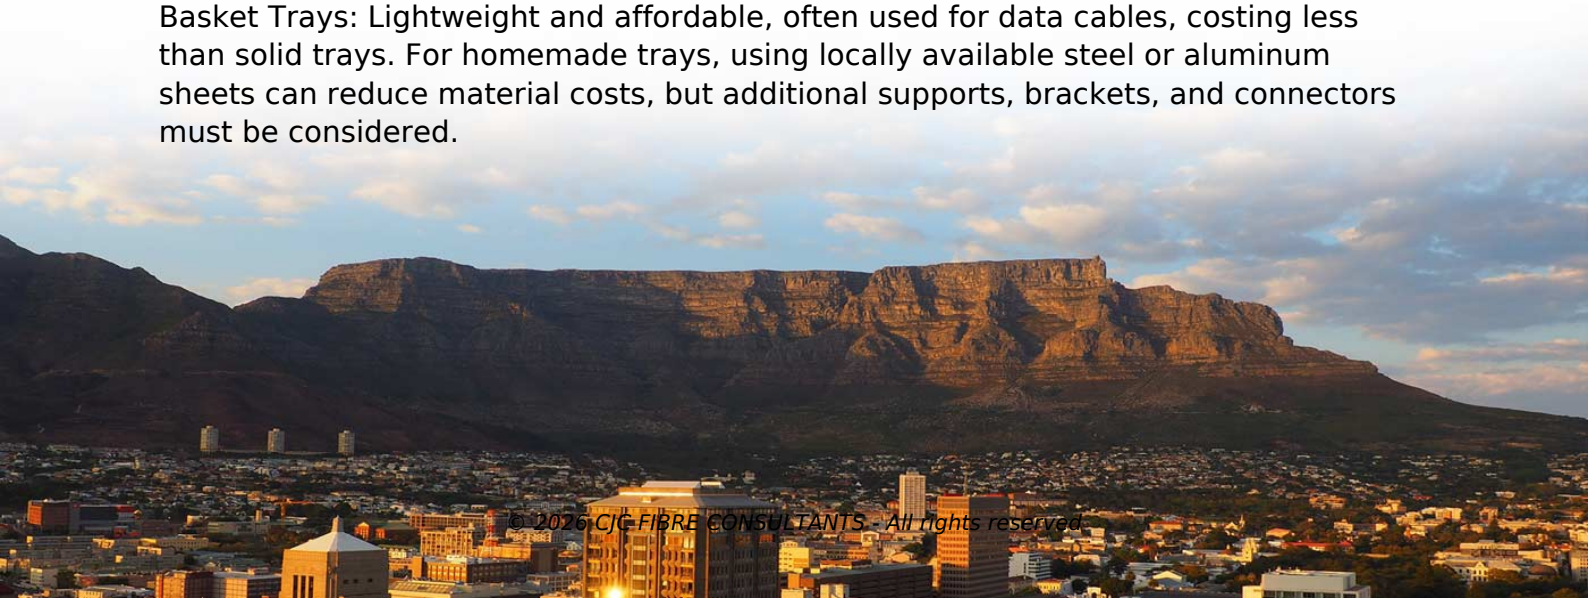

Material Costs

The primary factor affecting the cost of homemade cable trays is the material used: Steel: Most common and cost-effective, ranging from $5 to $25 per meter. Strong and durable, suitable for general installations. Aluminum: Lightweight and corrosion-resistant, costing $6 to $30 per meter, ideal for humid or industrial environments.

Fiberglass (FRP): More expensive at $10 to $50 per meter, offering long-term durability in aggressive environments.

Wire Mesh/

Basket Trays: Lightweight and affordable, often used for data cables, costing less than solid trays. For homemade trays, using locally available steel or aluminum sheets can reduce material costs, but additional supports, brackets, and connectors must be considered.

Design and Fabrication

Ladder trays: Open design, easier to fabricate on-site, generally more economical. Solid bottom trays: Require more material and labor, providing better protection for cables, thus increasing cost. Custom sizes: On-site fabrication allows flexibility but may increase labor and cutting costs.

Labor and InstallationOn-site fabrication involves cutting, welding, or bolting materials together. Labor costs vary by region and skill level: Skilled labor for cutting, welding, and assembly may add $10–$20 per meter to the total cost.

Simpler DI

Y assembly using hand tools can reduce labor costs but may require more time.

Additional Considerations

Supports and brackets: Essential for stability; typically add $2–$5 per meter. Surface treatment: Galvanizing or painting to prevent corrosion may add $1–$5 per meter. Project scale: Bulk fabrication reduces per-meter cost due to material efficiency and reduced labor per unit.

Estimated Total Cost

For a typical on-site homemade steel ladder tray: Material: $5–$15 per meterLabor: $5–$15 per meterAccessories: $2–$5 per meter Total estimated cost: $12–$35 per meter, depending on complexity and material choice.

Aluminum or FR

P trays will increase this range. By considering these factors, you can plan a budget for on-site homemade cable trays while balancing durability, protection, and cost efficiency.
