

Rapid Manufacturing of Cable Trays

Overview

From simple uncoiling and cutting machines to fully automated systems that form and weld trays in a continuous process, the options are diverse. Investing in a modern cable tray machine can dramatically improve a company's efficiency and competitiveness. HCM-600 Cable Tray Automatic Production Line is a cable tray roll forming line that adopts metal sheet coils as raw material. It forms the sheet into specific shapes and specifications through decoiling, leveling, punching, notching, and roll forming. Use a CNC punching machine for mounting holes, slots, louvers and repeated patterns; use a press brake for flanges, brackets, elbows, tees and reducers;. The cable tray production line is an intelligent mechanical integrated system designed for the production of cable tray systems, which realizes the precise forming of the bridge structure through automated processes. so, these systems are known as baskets, trunking, or cable ladders. The formed cable tray acts as a support system to safely carry electrical cables, wires. Zhongtuo's Cable Tray Roll Forming Machine is designed to solve these challenges by providing a fully automated, high-accuracy manufacturing solution for all common cable tray types.
