Reducing Tee Cable Tray

Overview

Horizontal tee fittings enable three-way cable routing with 4"–7" rail heights, 6"–36" widths, and 12"–36" radii. Offered in ladder and solid bottom aluminum configurations.

Key Takeaways

A reducing cable tray tee is a three-way fitting that allows cable trays to branch while reducing the width of one branch, enabling efficient cable routing in constrained spaces.

Function and Purpose

A reducing cable tray tee connects three cable tray sections, forming a T-shaped junction, while one branch is narrower than the main run. This allows for efficient cable distribution where space or cable volume decreases along one branch, maintaining proper support and organization for electrical wiring.

Types and Materials

Reducing tees are available in ladder and solid-bottom tray types. Ladder trays typically use I-shaped rungs, while solid-bottom trays have a flat sheet over the rungs. Common materials include aluminum for lightweight, corrosion-resistant applications, and stainless steel for heavy-duty or washdown environments.

Some reducing tees are designed to meet NEMA standards for compatibility with specific cable tray classes.

Dimensions and Compatibility

Rail heights: 4"–7"Widths: 6"–36"Radii: 12"–36"Reducer sizes: Common reductions include 6"x6" to 4"x6", 4"x6" to 4"x4", or 6"x6" to 3"x3" depending on the system. These fittings are compatible with I-BEAM ladder tray systems and other NEMA-standard trays, ensuring proper alignment and structural integrity.

Installation Considerations

Ensure the reducing tee matches the tray type, width, and rail height of the existing system. Use appropriate splice plates or connectors to secure the tee to the main and reduced branches. Consider load capacity and cable fill to prevent overloading the reduced branch.

For industrial or corrosive environments, select stainless steel or coated aluminum to enhance durability.

Applications

Reducing cable tray tees are widely used in: Industrial plants and factoriesCommercial buildings with varying cable volumesData centers and network installationsAreas requiring space optimization while maintaining cable support By using a reducing tee, installers can branch off cable runs efficiently without compromising structural support or cable management standards.

2-5 Series, Cable Tray and Ladder, Aluminum, Horizontal Reducing

By B-Line (Eaton) (6A-36-12-HT12) At Graybar, Your Trusted Resource For Cable Tray And Other B-Line (Eaton) Products.

Cable Tray Accessories

To facilitate easy installation of cable trays ve also manufacture accessories e.g. Vertical bend, horizontal bend, cross and horizontal tee. Our range includes

Cable Tray Horizontal Tees

Lay-in Galvanized Sweep Tees offers large radius turns when mounting to vertical or horizontal surfaces. This Sweep Tee LayIn Wireway, F1212TGV item fits 12.00x12.00 inches with a material of

Horizontal Reducing Tee | Ladder Trays | Cable Tray and Reels | Wire ...

The aluminum I-beam design of ITray is perfect for industrial installations with large diameter cables in long span situations, minimizing total tray width and creating a smooth transition between straight

Cable Tray Systems

I-BEAM Ladder - Reducing/Expanding Dropout Tee Ensure your cable tray solution is designed for your application, with our vast range of ladder tray fittings. Choose from the following: Horizontal elbows,

Cable Tray | Wire Mesh, Ladder Tray and More Wire Management

A cable tray system consists of metal or plastic trays that are mounted on walls or suspended from the ceiling. The trays are designed to hold cables securely, protecting them from damage and reducing

Resources for Cable tray and ladder systems

Submittals for cable ladder and tray Eaton''s submittal builder tool for B-Line series cable ladder and tray allows you to easily filter, select and download straight section, fitting and accessory submittals.

Cable Tray, Cable Bus, Wire Mesh Cable Trays | MP

MP Husky manufacturers Cable Tray Systems, Cable Bus System, Wire Mesh/Wire,Cable Tray, & Cable Management Systems. Our cable support
