Reference Price for North Korean Network Cabinets

Overview

Shop reliable and safe server rack and cabinet, network rack and cabinet, cable tray, cable fixer and other equipment at Lepin Network. Call us at 0086-574-58225795.

Key Takeaways

Exact North Korean network cabinet prices are not publicly disclosed, but international benchmarks suggest a range of $200–$1,500 per unit depending on type and specifications.

Market Context

North Korea's IT and data center infrastructure is highly restricted, and detailed pricing for network cabinets is not openly available. According to market research reports, the country has a small but growing data center and network cabinet market, with demand driven by government and enterprise IT infrastructure projects. Most network cabinets in North Korea are likely imported indirectly from China, India, or South Korea, or produced domestically under limited industrial capacity.

Price Benchmarks

While direct North Korean prices are unavailable, international wholesale and factory prices for network cabinets provide a reference: Standard 19-inch server racks or wall-mount cabinets: $200–$500 per unit for basic models. High-end data center cabinets with advanced cooling, modular design, or security features: $800–$1,500 per unit. Bulk orders may reduce per-unit costs, but shipping and sanctions can significantly increase the effective price for North Korea.

Factors Affecting Price

Cabinet Type: Wall-mounted, free-standing, or open-frame racks vary in cost. Size and Capacity: Larger cabinets with higher U-space and weight capacity are more expensive. Features: Cooling systems, cable management, and security locks increase price.

Supply Chain Constraints: Due to sanctions, importing cabinets into North Korea may involve intermediaries, raising costs beyond standard international prices.

Practical Guidance

For a rough reference, businesses or researchers can use Chinese or Indian factory prices as a baseline, then adjust for shipping, import restrictions, and local modifications. Contacting suppliers on B2B platforms like Global Sources can provide quotes for similar cabinets, which can serve as a proxy for North Korean market pricing. In summary, while exact North Korean network cabinet prices are not publicly listed, $200–$1,500 per unit is a reasonable reference range depending on specifications and features, with higher-end models used in data centers likely at the upper end of this range.
