Romanian Vertical Shaft Cable Tray Price

Overview

Price List Cable Tray 2024 - Free download as PDF File (.pdf), Text File (.txt) or view presentation slides online.

Key Takeaways

Vertical shaft cable trays in Romania typically range from €20 to €150 per meter, depending on material, size, and specifications.

Overview of Cable Tray Types and Materials

Vertical shaft cable trays are used to route electrical cables safely in industrial and civil buildings. In Romania, they are commonly available in galvanized steel, stainless steel, and aluminum, with perforated or solid-bottom designs for ventilation and fire safety. Standard widths range from 50 mm to 600 mm, and heights from 35 mm to 100 mm, with 60 mm being the most common.

Factors Affecting Price

Material: Galvanized steel is generally the most cost-effective, while stainless steel and aluminum offer higher corrosion resistance and durability, increasing the price. Dimensions: Wider and taller trays, or those with thicker metal sheets, cost more due to higher material usage. Perforation and Design: Perforated trays allow better ventilation but may be slightly more expensive than solid-bottom trays.

Certifications: CE marking, compliance with IEC/EN standards, and fire safety certifications can influence cost, especially for industrial or public infrastructure projects. Supplier and Logistics: Domestic manufacturers in Bucharest and Ilfov offer competitive pricing and fast delivery, while international suppliers may charge more due to shipping and import costs.
