

SC APC Fiber Optic Connector Single Core

Overview

The SC is an optical fibre connector for applications in the telecommunications sector, data centres, LAN cabling and for connecting active components. SC connectors are available for singlemode and multimode applications. The SC/APC plug connector has an oblique, polished. SC / APC fiberglass connectors are equipped with angular polishing of the ferrule end face, which allows the optical fiber to be connected with considerable precision and minimum losses. Single-mode coupling for both PC and APC connections are equipped with. This article is a selection guide for Fiber patch cords and pigtails, which systematically introduces the definitions and differences between the two, different application environments and construction types, specifications and parameters of single core and multi-core Fiber Optic connectors. The 12-Core SC/APC Fiber Optic Adapter (One-Piece Type) is a high-density, efficient solution for connecting multiple fiber optic cables in structured cabling systems.
