Singapore Fiberglass Cable Tray Bracket Specifications

Overview

We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation.

Key Takeaways

Fiberglass cable trays in Singapore are made from fire-retardant resins reinforced with fiberglass, offering high strength, corrosion resistance, UV protection, and compliance with ASTM E-84 and NEMA FG-1 standards.

Material and Construction

Fiberglass cable trays, also known as FRP (Fiber Reinforced Plastic) or GRP (Glass Reinforced Plastic) trays, are manufactured using pultrusion technology, combining high-quality glass fibers with epoxy or polyester resins to form a strong, lightweight composite structure. The trays are typically available in ladder-type, tray-type, or trough-type cross-sections, with optional internal stiffeners to enhance load-bearing capacity. Surface treatments can include flame-retardant, UV-resistant, or anti-slip coatings to suit specific environmental requirements.

Resin Types and Fire Safety

Common resin systems include Isophthalic Polyester (IFR) and Vinyl Ester, with varying fire-retardant properties. Type I (IFR) is industrial-grade and meets Class 1 fire rating according to ASTM E-84, while Type II is suitable for acidic environments but may not be fire-retardant.

P trays are also halogen-free, self-extinguishing, and comply with ASTM D-635 for flame propagation.

Mechanical and Electrical Properties

Fiberglass trays are non-conductive and non-magnetic, eliminating the need for grounding and reducing electrical hazards. They provide high strength-to-weight ratios, often weighing only one-third of equivalent steel trays while maintaining superior load capacity. The low thermal conductivity helps maintain optimal cable operating temperatures, and the trays offer good electrical insulation.

Environmental ResistanceFRP cable trays are highly resistant to corrosion, chemicals, and UV exposure, making them ideal for marine, chemical, and outdoor applications. They maintain structural integrity under harsh conditions and are suitable for long-term use in coastal areas, refineries, and industrial plants. The trays are also designed to withstand prolonged sun exposure without degradation.

Standards Compliance

Singapore fiberglass cable trays comply with key international standards, including: ASTM E-84: Surface burning characteristicsASTM D-635: Self-extinguishing requirementsNEMA FG-1: Outdoor suitability and flame retardancy Installation and CustomizationFRP trays are lightweight and easy to install, reducing labor and transportation costs. They can be manufactured in long standardized lengths (up to 6 meters), and custom colors or surface finishes are available to meet project-specific requirements. The trays are suitable for substations, power plants, laboratories, and industrial facilities where corrosion resistance and electrical safety are critical.

In summary, fiberglass cable trays in Singapore provide a durable, lightweight, and corrosion-resistant solution for cable management in harsh environments, combining fire safety, electrical insulation, and compliance with international standards for reliable long-term performance.

FRP Cable Bracket | Fiberglass Cable Tray Support

FRP cable brackets are manufactured from fiberglass reinforced plastic (FRP / GRP). The exact profile, thickness, mounting style, and finish can be selected according to project conditions and load

P31 cable trays | | Products | Legrand Singapore

Available in solid or perforated sheet metal, the P31 cable tray offer exists in different versions to ensure you find the right answer to your specific requirements:

FRP / GRP Cable Tray and Cable Ladder

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

Plastic FRP or GRP Cable Tray and Cable Ladder supplier in Singapore. It is a type of Cable Support System made of Fibreglass and are Flame Retardant, Halogen

Cable trays

We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like

Fiberglass channel tray | Polyester cable ladder | Vinyl

Tested for ABS, NEMA and IEC, B-Line series fiberglass cable tray is ideal for harsh, marine and caustic environments. Learn about its corrosion resistant

Fiberglass Reinforced Plastic (FRP) Cable Tray

SFSP-INTECH Fiberglass Reinforced Plastic Cable Management System is available with a full range of fittings, splices, covers, accessories and support channels of cantilever and trapeze junctions.

Cable Tray Support Bracket

At the heart of our Cable Tray Support Brackets lies the advanced SMC production process. This method combines high-quality glass fibers with unsaturated

United U-Li Projects Pte Ltd

Established in 2009, United U-Li Projects Pte Ltd carry a comprehensive range of high quality cable trays, trunkings, cable ladders, conduits,

FRP Cable Trays Supplier in Singapore | Ferrotech

Manufactured from premium fire-retardant resins and reinforced with fiberglass for added strength, these trays provide exceptional durability and safety for your critical electrical infrastructure.

F-0386-22 Fiberglass Support Bracket | Ladder Trays

For extremely corrosive applications we offer a full line of straight sections, fittings, covers and mounting accessories in polyester and vinylester fiberglass. Rail

Fiberglass Reinforced Plastic (FRP) Cable Tray

Fiberglass Reinforced Plastic (FRP) Cable Tray SFSP FRP Cable management System is manufactured under the brand name “Intech”, and is distributed exclusively by Unitech for Building and
