

Slovenia s production of long-span cable trays

Overview

Cable Trays Elba produces cable trays and accessories. They are made of tinned sheet metal or stainless steel plates and can also be hot-tinned or powder coated to order.

Key Takeaways

Slovenia produces long-span cable trays through advanced manufacturing by companies like Hermi, Elba, and Bevec, with modern facilities and automated production lines enhancing capacity and quality.

Key Manufacturers

Hermi has recently expanded its production facility in Celje, Slovenia, significantly increasing its capacity for cable trays and ladders. The company invested in a modern automated production line, which allows for faster production, higher quality control, and digitalized processes. This expansion is expected to triple Hermi's production capacity, particularly for cable trays and ladder systems, enabling the company to meet growing domestic and international demand.

Elba d.o.o. is another leading Slovenian manufacturer, producing a wide range of electrical installation products, including cable trays. They utilize state-of-the-art TRUMPF laser machines and computer-guided bending machines to process various sheet metals such as stainless steel, brass, and aluminum. Their production emphasizes precision, versatility, and durability, with options for powder coating to enhance longevity.

Bevec d.o.o. manufactures cable trays ranging from 50 to 600 mm in width and 50 to 60 mm in height. They offer a variety of materials, including galvanized, hot-dip galvanized, and stainless steel sheets, with powder coating available. Bevec also provides a wide selection of bends, couplers, and support systems to facilitate installation in complex building layouts.

Production Capabilities and Technology

Slovenian manufacturers employ automated and CNC-controlled production processes, ensuring high precision and efficiency. Modern facilities allow for the fabrication of long-span cable trays suitable for industrial, transportation, and infrastructure projects. The use of advanced machinery and digitalized workflows enables manufacturers to produce complex designs with consistent quality.

Market Overview

The Slovenian cable tray market includes both metal and plastic trays, with production driven by domestic demand and export opportunities. Companies focus on meeting environmental standards and providing durable, adaptable solutions for electrical and telecommunication installations. The market is competitive, with continuous investments in technology and production capacity to respond to increasing demand.

Summary Slovenia's production of long-span cable trays is characterized by highly automated, technologically advanced manufacturing, with key players like Hermi, Elba, and Bevec leading the sector. Recent expansions and modern facilities have enhanced production capacity, quality, and flexibility, positioning Slovenia as a capable producer for both domestic and international markets.
