

Specifications of Galvanized Cable Trays in Myanmar

Overview

We offer top-notch Galvanized Cable Trays in Myanmar. These metal trays, coated with a special zinc shield, resist rust and last a long time, even in tough environments.

Key Takeaways

Galvanized cable trays in Myanmar are made from hot-dip galvanized steel, offering corrosion resistance, durability, and are available in standard widths from 50mm to 900mm with customizable lengths and heights.

Material and Construction

Galvanized cable trays are manufactured from high-grade steel sheets coated with zinc through a hot-dip galvanization process, which provides excellent protection against rust and corrosion, making them suitable for harsh environments in industrial, commercial, and residential applications. The trays are designed for quick installation, proper ventilation, and long-lasting performance. Common types include ladder trays, perforated trays, and solid-bottom trays, each serving different cable management needs.

Standard Dimensions

Cable trays in Myanmar are available in a variety of standard widths, heights, and lengths: Widths: 50mm, 75mm, 100mm, 150mm, 200mm, 225mm, 250mm, 300mm, 350mm, 400mm, 450mm, 500mm, 550mm, 600mm, 700mm, 750mm, 900mm. Heights: 50mm, 75mm, 85mm, 100mm, 200mm. Lengths: 2440mm, 2500mm, 3000mm.

These dimensions can be customized based on project requirements, including special widths, heights, or lengths, as well as color and perforation patterns.

Types and Features

Ladder Cable Trays: Consist of two side rails connected by rungs, providing maximum ventilation for heat-producing cables. **Perforated Cable Trays:** U-shaped channels with center perforations and side collars, allowing airflow and heat dissipation.

Solid-

Bottom Cable Trays: Made from a single sheet of metal, offering protection from external damage, ideal for control and communication cables. Accessories such as connectors, joints, earth links, elbows, tees, crosses, reducers, and covers are available to facilitate installation and directional changes.

Applications

Galvanized cable trays are widely used in industrial, commercial, and residential projects, including electrical, construction, and automotive industries. They ensure organized cable management, safety, and compliance with electrical standards.

Customization and Standards

Manufacturers in Myanmar offer customized solutions to meet specific project needs, including non-standard dimensions, special coatings, and color options. Many trays comply with NEMA VE1-2002 and TCVN 197-2002 standards, ensuring quality and reliability. In summary, galvanized cable trays in Myanmar provide robust, corrosion-resistant, and versatile cable management solutions with a wide range of standard and customizable dimensions suitable for various industrial and commercial applications.
