# Specifications of South Asia Anti-corrosion Distribution Boxes

## Overview

South Asia Explosion-proof and Corrosion-resistant Distribution Box. Explosion Proof Distribution Box & Electrical Enclosures Weatherproof Stainless Stee.

## Key Takeaways

South Asia Anti-Corrosion Distribution Boxes are designed for hazardous and harsh environments, offering explosion-proof protection, corrosion resistance, and customizable configurations.

### Materials and Construction

These distribution boxes are typically constructed from glass fiber reinforced unsaturated polyester resin, die-cast aluminum alloy, carbon steel, or stainless steel, providing excellent corrosion resistance, impact resistance, and thermal stability. Stainless steel variants feature brushed finishes and exposed stainless steel fasteners for superior anti-corrosion performance. Aluminum and carbon steel surfaces often have high-pressure electrostatic powder coatings to enhance durability.

### Explosion-

Proof and Safety FeaturesThe boxes are designed to prevent sparks or arcs from igniting flammable gases, making them suitable for chemical plants, offshore rigs, and mining sites. They comply with standards such as GB/T3836 series and IEC 60079 series, ensuring safe operation in explosive-prone areas. Modular designs allow flexible combination of circuits, and switch handles can be color-coded or padlock-equipped to prevent accidental operation.

### Environmental Protection

Most models offer IP65 to IP67 ratings, providing full protection against dust and water ingress. They are UV-resistant, halogen- and silicon-free, and can withstand rain, ice, snow, and corrosive chemicals. Operating conditions typically range from -40°C to 60°C with humidity up to 95% non-condensing.

### Internal Components and Customization

Distribution boxes can be fitted with circuit breakers, AC contactors, thermal relays, surge protectors, fuses, meters, pushbuttons, and signal lights according to user requirements. Wiring can be done via steel pipes, cables, or explosion-proof hoses, and boxes are available in vertical or hanging types. Customization is available for internal layout, built-in elements, and electrical schematics to meet specific industrial needs.

### Applications

These boxes are ideal for industrial, marine, offshore, and chemical environments, where explosion-proof and corrosion-resistant power distribution is critical. They ensure safe, reliable, and long-term operation in harsh conditions, protecting both equipment and personnel. In summary, South Asia Anti-Corrosion Distribution Boxes combine robust materials, explosion-proof design, high IP protection, and customizable internal configurations, making them suitable for demanding industrial and hazardous applications.
