The optical port of the switch cannot be changed to 100Mbps

Overview

Please check the type of optical module (s) on interface XGigabitEthernetx/x/x/x" is displayed, the type of the optical module installed on the port is not supported by the port. Run the display transceiver command to check the value of the Transceiver Type field. I have a S3300 switch with a SPF+ port which is currently active but which is set to no auto-negotiation, 100 Mbps, Full-duplex. I know this because in another port on a different switch it operates at 1 Gbps. Using. I was just about to say that the switchports have PoE enabled by default, you might want to turn it off. 12-13-2021 03:55 PM Force the ports to negotiate to 10/100 Mbps: speed auto 10 100 IMPORTANT: Make sure to include the mode "auto". 12-14-2021. When you run the port interface { interface-type interface-number1 [to interface-type interface-number2] } & enable command to configure CSS member ports, if the message "Error: Configuration failed. Port speeds can often be configured or negotiated based on. Because it cannot be possible to ensure that every user has either a 10 Mb, a 100 Mb Ethernet, or a 10/100 Mb card in their laptop, the switch ports that handle these connections must be able to negotiate their speed and duplex mode.
