Tunisian Offshore Price Optical Modulator OSFP

Overview

Welcome to OSFPmsa November 23, 2025 Rev 1.11 :: Specification for OSFP-XD Octal Small Form Factor eXtra Dense Pluggable Module September 12, 2024 Rev. 1.1.

Key Takeaways

OSFP optical modulators in Tunisia are influenced by global market trends, with prices typically reflecting high-speed 400G to 1. 6T modules, and offshore procurement costs likely ranging from several hundred to a few thousand USD per unit depending on specifications.

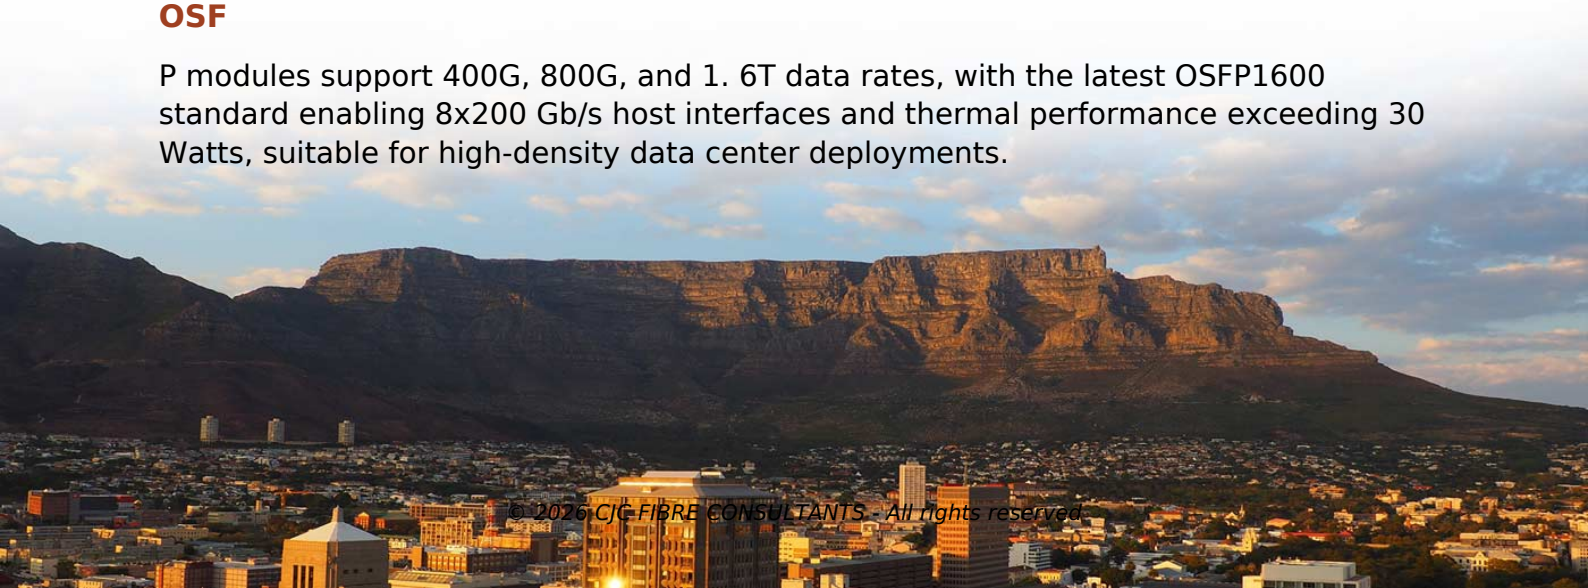

Market Context

The OSF

P (Octal Small Form-factor Pluggable) optical module market is experiencing rapid growth due to increasing demand for high-bandwidth, low-latency data transmission in data centers, cloud computing, and AI applications. Globally, the market size was estimated at $587 million in 2025, with a projected CAGR of 25% through 2033.

OSF

P modules support 400G, 800G, and 1. 6T data rates, with the latest OSFP1600 standard enabling 8x200 Gb/s host interfaces and thermal performance exceeding 30 Watts, suitable for high-density data center deployments.

Pricing Considerations

While specific Tunisian offshore prices are not publicly listed, global OSFP module pricing is influenced by: Data rate and type: 400G modules are generally less expensive than 800G or 1. 6T modules. Supplier and brand: Leading manufacturers like II-VI Incorporated, FS, ProLabs, Cisco, and Molex may command premium pricing due to reliability and support.

Volume and procurement method: Offshore bulk orders often reduce per-unit costs but may include shipping, import duties, and taxes. Technological features: Modules with integrated heatsinks, advanced thermal management, or backward compatibility with OSFP800 may cost more. Based on global trends, 400G OSFP modules typically range from $800 to $1,500 per unit, while 800G modules can range from $2,000 to $4,000 per unit, and 1.

6T OSFP1600 modules may exceed $5,000 per unit in offshore markets. Tunisian import costs may add 10–20% depending on logistics and customs.

Regional Adoption in Tunisia

The Tunisian optical modulators market is growing steadily, driven by telecom infrastructure upgrades, data center expansion, and increasing adoption of fiber-optic communication systems.

While North America and Asia-

Pacific dominate global adoption, Tunisia and North Africa are gradually integrating high-speed optical modules, particularly for data center interconnects and AI-driven applications.

Recommendations for Procurement

Engage with authorized distributors or regional resellers to obtain accurate offshore pricing and shipping terms. Consider module specifications carefully: higher data rates and advanced thermal management increase cost but improve performance and longevity. Monitor global supply trends: OSFP module availability can be affected by supply chain disruptions, which may impact offshore pricing.

Evaluate total landed cost: Include shipping, customs, and potential import taxes when calculating the final offshore price for Tunisia. In summary, while exact Tunisian offshore prices vary, expect 400G modules around $800–$1,500, 800G modules $2,000–$4,000, and 1. 6T OSFP1600 modules above $5,000, with regional adjustments for shipping and import duties.

The market outlook remains positive, with adoption likely to increase as data center and AI infrastructure expand in Tunisia.

200G/400G/800G Optical Transceiver Modules | FiberMall

200G/400G/800G optical module features up to 40km transmission distances using QSFP56/QSFP-DD footprints for data center interconnect applications - FiberMall

400G OSFP/QSFP112/QSFP-DD | Transceiver Modules

FS provides an expanding portfolio of 400G OSFP/QSFP112/QSFP-DD solutions featuring high-performance, high-bandwidth, and backward compatibility. The

Tunisia Joins QSFP28 Optical Module OSFP

AITAF provides end-to-end optical communication solutions, structured cabling, ODN, optical modules, fiber testing instruments, data center networks, base station energy, smart city communications, and

800G OSFP-Product Solutions-INNOLIGHT

800G OSFP optical module includes two architecture solutions, 4x100Gx2 and 8X100G. In addition to the traditional EML design, it also adopts silicon-based solution to meet short-distance transmission

1.6T OSFP-XD DR8 MPO-16 Optical Transceiver | FiberMall

FiberMall OSFP-XD-1.6T DR8 transceiver is a high-performance optical module with a maximum transmission distance of 2 km, suitable for high-bandwidth requirements.

1.6T OSFP 2xDR4/DR8, 1310nm, 500m, DDM, CDR,

It works to interconnect equipment with OSFP model interfaces/optical ports for exchanging and transmitting data of up to 1.6Tbps. Through a single-mode

Optical Transceiver Modules Prices & Specifications

OSFP (Octal Small Form Factor Pluggable) optical module: the OSFP is a new pluggable form factor with eight high speed electrical lanes that will initially

OSFP Optical Module Market Competitive Landscape Report 2035

OSFP Optical Module Market Overview: The OSFP Optical Module Market Size was valued at 1,300 USD Million in 2024. The OSFP Optical Module Market is expected to grow from 1,470 USD Million
