UAE High-Voltage Cast Busbar Manufacturing

Overview

DELTABAR is a flexible and reliable electrical distribution system with a sandwich construction, unique joint design and superior performance.

Key Takeaways

The UAE hosts several manufacturers producing high-voltage cast resin busbars and advanced busway systems, including Delta Electric, Bahra Electric, and Powerbar Gulf LLC, offering certified, high-performance solutions for industrial and commercial power distribution.

Key Manufacturers and Capabilities

Delta Electric (FZE), based in Sharjah, is a pioneer in the UAE and GCC for manufacturing low and medium voltage cast resin metal-enclosed busway systems. Their DELTABAR® systems feature copper and aluminum conductors enclosed in extruded aluminum with advanced cooling and thermal withstand capabilities up to 185°C for three hours, certified according to IEC and UL standards. Delta Electric specializes in sandwich busbar trunking systems with compact, tightly compressed flat conductors for reliable performance and heat dissipation.

Bahra Electric produces medium and high-voltage busways ranging from 630 A to 6300 A, suitable for industrial and high-power applications. Their facilities also manufacture cast resin transformers up to 5000 kVA and aluminum rods for conductor production. Bahra Electric emphasizes high efficiency, safety, and reliability in their busway systems, supporting both low and high-voltage applications.

Powerbar Gulf LL

C offers a wide range of cast resin busbars, medium voltage segregated and non-segregated phase busbars, and busbar trunking systems. They also provide low and medium voltage switchgear, package substations, and pre-fabricated switchrooms, catering to industrial and commercial power distribution needs.

Schneider Electric UA

E supplies busway systems designed for flexibility, compactness, and efficiency in industrial and commercial environments. Their solutions include modular busbars and accessories for streamlined installation and maintenance.

Production Features and Standards

Cast Resin Technology: Provides insulation and protection against electrical faults, moisture, and chemical exposure. Sandwich Busbar Design: Ensures no air gaps between conductors, reducing impedance and voltage drop while improving heat dissipation. Certifications: Systems are validated by international standards such as IEC, UL, and DECRA, ensuring safety and reliability.

Materials: High-conductivity copper or aluminum conductors with epoxy or hybrid powder coatings for corrosion and water resistance. Applications: Industrial plants, commercial complexes, substations, and high-power distribution networks.

Summary

The UA

E has developed a robust local capability for high-voltage cast busbar production, with manufacturers offering customizable, certified, and high-performance busway systems. These systems are suitable for a wide range of applications, from medium-voltage industrial installations to high-power commercial and utility projects, ensuring safety, efficiency, and long-term reliability. Key players include Delta Electric, Bahra Electric, Powerbar Gulf LLC, and Schneider Electric UAE, each providing specialized solutions for modern power distribution needs.
