

UK High and Low Voltage Busbar Manufacturer

Overview

Busbar Manufacturer UK | Copper & Aluminium Busbars As one of the UK's leading busbar suppliers and manufacturers, H V Wooding provides precision-engineered.

Key Takeaways

The UK hosts a range of leading busbar manufacturers offering high and low voltage solutions in copper and aluminium, including bespoke designs, flexible systems, and full assembly services.

Key UK Busbar Manufacturers

H V Wooding specializes in precision-engineered copper and aluminium busbars for high-voltage switchgear, EV and hybrid battery systems, and renewable energy applications. They offer busbars down to 0.3mm in copper and 0.5mm in aluminium, with advanced insulation coatings achieving dielectric ratings from 1.5kV to 5kV, supporting both prototype and volume production. Gordon Kitto Limited (GKW) designs, manufactures, installs, and maintains low, medium, and high voltage busbars.

5mm in aluminium, with advanced insulation coatings achieving dielectric ratings from 1.5kV to 5kV, supporting both prototype and volume production. Gordon Kitto Limited (GKW) designs, manufactures, installs, and maintains low, medium, and high voltage busbars.

Their offerings include busway, busduct, isolated phase busbars (3.6kV–36kV, up to 40kA), and open busbars for industrial and chemical processes, ensuring high reliability and fault-handling capacity.

IL

F Ltd provides custom copper and aluminium busbars, laminated connectors, flexible busbars, and busbars for switchgear and panel builders. They focus on high-quality materials, plating options, and tailored designs for industrial, data centre, and automotive applications.

NC

E Switchgear delivers complete busbar fabrication for high, medium, and low voltage systems across Scotland and the UK. Services include epoxy coating, sleeving, plating, bending, and assembly, catering to switchgear, railway, renewable energy, marine, and power electronics sectors.

A

F Switchgear (AF Preedcrete Ltd) offers bespoke busbar systems with aluminium or copper conductors, including IP55/IP68 cast resin busbar systems, riser bars, and feeder bars rated up to 6300A. They provide design, manufacture, installation, and testing for commercial and industrial projects. Eaton manufactures rigid and flexible busbars for low and high voltage applications, including EV charging, power inverters, and industrial systems.

They provide CNC bending, progressive stamping, over-molding, and insulation options, with internal testing for dielectric strength. Anord Mardix (IBAR) produces high-power busbar trunking systems with insulated copper or aluminium conductors, rated up to 6300A, suitable for multi-storey facilities and critical power distribution. Their systems comply with BS EN 61439-6.

G Corner specializes in bespoke DC and AC busbar systems for electro-refining, electro-winning, and industrial battery applications, offering design, engineering, and replacement parts for high-current systems.

LM

L Products provides custom copper and aluminium busbars for power and earthing, with technical support, electroplating, insulation, and high-frequency applications. They focus on precision, rapid delivery, and project-specific solutions. Considerations for Selecting a Manufacturer Voltage and Current Ratings: Ensure the manufacturer can meet your high or low voltage requirements, including fault current capacity.

Material Choice: Copper offers superior conductivity and durability, while aluminium is lighter and cost-effective. Insulation and Coating: Options like epoxy, powder coating, heat-shrink sleeving, and plating are critical for high-voltage safety. Compliance: Look for adherence to UK and EU standards, such as BS EN 61439 for low-voltage switchgear.

Customization and Support: Manufacturers offering design assistance, prototyping, and assembly services can optimize system performance.

These U

K manufacturers collectively cover a wide spectrum of busbar solutions, from standard low-voltage panel boards to high-voltage industrial and renewable energy systems, ensuring reliable and compliant power distribution.

Article Content

Busbar Manufacturer UK | Copper & Aluminium Busbars

As one of the UK's leading busbar suppliers and manufacturers, H V Wooding provides precision-engineered copper busbars and aluminium busbars for customers across energy, EV, and industrial

Busbar Manufacturer & Specialist Metal Supplier | ILF

As a leading copper and aluminium supplier in the UK, we at ILF Products are here for you to provide high-quality custom busbar designs and

Busbar Specialists

We manufacture our busbar systems right here at our Merseyside premises. We also offer maintenance plans, modifications and retrofits to existing systems.

Top 100 Busbar Manufacturers in United Kingdom (2026) | ensun

Total Connections manufactures busbars on-site in the UK, utilizing high-quality copper and steel. They are known for producing a range of electrical connectors and custom-designed terminals, ensuring

Busbar Manufacture, Precision components | H V Wooding

H V Wooding is a well-established, industry-leading UK sub-contract manufacturer with over 50 years of experience in the production of high-specification components, including copper busbars, aluminium

Copper Busbar Manufacturer | NCE Switchgear Serving

NCE Switchgear are a leading busbar manufacturer providing complete busbar fabrication for high, medium and low voltage busbar requirements in Scotland

Busbars | Busbars manufacturers & supplier | Eaton

Our primary manufacturing processes include progressive stamping, Computer Numerical Control (CNC) bending and our RigiFlex™ technology that delivers flexible solutions. We specialize in both low- and

Bespoke Busbar Systems

In partnership with the leading manufacturers of IP55 & IP68 Cast Resin Busbar Systems, we are able to offer a complete solution for all your busbar requirements, including design, manufacture, installation

Copper Busbar Supplier & Metal Stockholders in the UK | ILF Ltd

ILF Ltd is a leading UK supplier of high-specification metals and manufactured components for use in precision engineering, including busbars, switchgear, military grade plugs, safety connectors,

Busbars | Busbars manufacturers & supplier | Eaton

Busbars are metal bars that can be composed of numerous alloys but are most commonly copper or aluminum. Typical busbar applications include switchgear, panel boards, power invertors, powered

Low Voltage Busbar Trunking Guide | PDF | Electrical ...

This document provides guidance on low voltage busbar trunking systems according to BS EN 61439-6. It defines busbar trunking systems and components, and describes their typical applications for

Global Busbar Trunking Market Size, Opportunity Analysis and

Every commercial office building, retail facility, data centre, hospital, and manufacturing plant requires low-voltage busbar trunking for primary power distribution within the facility envelope,

Busbar Systems & Electrical Trunking | Schneider Electric UK

Design a flexible and efficient power distribution system with Schneider Electric UK's innovative busbar systems. Explore Canalis busbars for a modular approach to electrical distribution.

Busbar Market Size, Industry Share | Forecast, 2026-2034

Manufacturing growth increases demand for medium- and high-voltage busbar systems. Expansion of residential and commercial construction boosts low-voltage applications.

EAE Group | Company Information

EAE UK Ltd is the company representing the EAE Group in the UK market. The company is engaged in the commercialization of busbars used for the distribution

Busbars | Electrical Busbars & Copper Busbars | RS

They can also be used to connect high-voltage equipment. Aluminium Busbars: Aluminium busbars are an alternative to copper busbars, offering lower cost and lighter weight. They are often used in

Standoff Insulators Manufacturer & Supplier | Powermat

Powermat is the largest manufacturer of electric insulators & busbar supports worldwide, delivers high-quality standoff insulators for electrical panels, switchgear, and industrial needs.

Busbar Manufacturer UK | Copper & Aluminium Busbars

From high-voltage switchgear to advanced EV and hybrid battery systems, our precision-engineered busbars are trusted worldwide for performance and reliability. With over 50 years of expertise, we
