Uganda power distribution box obstruction

Overview

The Auditor General has indicated that nearly “half of the transformers on five out of the 13 distributions lines sampled in northern and eastern Uganda under the Umeme distribution network, were not in satisfactory condition, thus risking equipment and lives of people. The Auditor General has indicated that nearly “half of the transformers on five out of the 13 distributions lines sampled in northern and eastern Uganda under the Umeme distribution network, were not in satisfactory condition, thus risking equipment and lives of people. This is the official Website of the The Uganda Electricity Distribution Company Limited (UEDCL). Material featured on this site may be reproduced free of charge in any format or media without requiring specific permission. The assurance comes at a time when consumers across the country. While we work to ensure that our customers stay powered up, we regularly embark on maintenance practices e. maintenance of our equipment, hardware/software upgrades, troubleshoot incidents & unplanned issues. You can now know when. ERA engages Kalangala Infrastructure Services (KIS) to assess network performance and advance reliable electricity supply for communities. ERA in collaboration with the Directorate of Water Resources Management (DWRM) and SWECO under the Norwegian Water Resources and Energy Directorate (NVE), is. Uganda's Electricity sub-Sector is run under a liberalized set up following its Liberalization in 1997 and the enactment of the Electricity Act, 1999. The Liberalization and enactment of the Electricity Act, 1999, mandated the unbundling of Uganda Electricity Board (UEB) which was a monopoly. Uganda's struggle to stabilize power distribution may feel acute, even alarming, but it is not unique within the East African region. When viewed comparatively, Uganda's experience fits a broader regional pattern where generation has raced ahead of distribution, and where last mile constraints have.
