Which brand of explosion-proof cable trays is the best

Overview

Anti-corrosive Cable Trays Selection: A Comprehensive Learn how to choose the best anti-corrosive cable trays for your electrical system. Discover the idea.

Key Takeaways

Top recommended brands for explosion-proof cable trays include Legrand, EX Industries, and Spina Group, all offering certified, durable solutions for hazardous environments. Key Brands and Features1. Legrand Legrand provides a wide range of cable management solutions, including cable trays suitable for industrial and hazardous environments.

Their products comply with European directives and are certified by third parties such as UL, LCIE, and IMQ, ensuring safety and reliability in explosive atmospheres. Legrand offers various materials and finishes to meet environmental and mechanical requirements, making them a trusted choice for industrial installations. 2.

EX Industries E

X Industries specializes in explosion-proof cables and cable trays for hazardous areas. They offer solutions compliant with ATEX, IEC, NEC Division 2, and offshore/shipboard standards. Their product range includes instrumentation, control, and power cables, and they provide guidance on proper installation and cable gland selection.

X Industries is known for high-quality, certified products suitable for North American and international hazardous zones. 3. Spina Group Spina Group, based in Italy, manufactures cable trays and accessories under brands like Schiavetti Tekno, Eurocavi, Atex, and ITE.

Their products are UL and NEMA certified and designed for high-corrosion and explosion-risk environments. Spina Group offers both standard and tailor-made solutions, ensuring compliance with CEI, EN IEC, BS, NF, VDE, UL, ATEX, NEC, and IECEX standards. They are particularly suitable for industrial and offshore applications.

Material Considerations

For explosion-proof and hazardous environments, cable trays are typically made from: Stainless steel (AISI 316L): Excellent corrosion resistance, suitable for chemical or offshore environments. Aluminum alloys: Lightweight, corrosion-resistant, and easy to install. Galvanized steel: Cost-effective for mild to moderate corrosion environments.

Certifications to Look For

When selecting explosion-proof cable trays, ensure the products have: UL or NEMA certification for North American complianceATEX or IECEx certification for European and international hazardous zonesCE marking for compliance with European directivesThird-party testing for mechanical and electrical safety These brands and certifications ensure that the cable trays are safe, durable, and compliant for use in explosive or hazardous industrial environments.
